WORK EXPERIENCE

Urgent IT Solution

Mar 2026 - Present

MERN Stack Developer Intern

Core Project: PackagingBazaar — Live Website 🌐 | GitHub Repository 🐙

- Actively building and maintaining the responsive frontend user interface and secure backend services of PackagingBazaar using the MERN stack.
- Designed and managed the relational database architecture using MySQL to securely handle dynamic product inventories and categories.
- Collaborating in daily agile scrum meetings with a team of developers to track project components and deliver production-ready features.
- Debugging complex backend APIs, conducting application tests, and authoring clear technical documentation for internal developer workflows.

EDUCATION

Government Polytechnic Ghaziabad

2023 - 2026

Diploma in Information Technology

PROJECTS

Airbnb Clone | Live Demo 🌐 | GitHub 🐙

2026

- Built a full-stack web application incorporating complete CRUD functionality to catalog multiple mock property listings and user reviews.
- Implemented secure user session authentication and role-based access control utilizing **Passport.js**.
- Designed the server-side architecture using the MVC pattern to ensure a clean, maintainable separation of database business logic.

WebRTC Video Call Application | Live Demo 🌐 | GitHub 🐙

2025

- Created a real-time one-on-one peer-to-peer web video calling platform leveraging React UI, Node.js, and browser WebRTC protocols.
- Configured Socket.io for managing real-time websocket signaling states, enabling seamless network handshakes between active clients.
- Managed native browser media stream tracks and fallback connection handling to ensure a highly stable real-time communication experience.

Zerodha Clone - Trading Platform UI | Live Demo 🌐 | GitHub 🐙

2025

- Developed an interactive single-page frontend clone of the Zerodha trading platform featuring multiple financial data tracking widgets.
- Integrated secure user authentication using **JWT** to handle login states and protect user dashboard routes.
- Replicated complex stock dashboard layouts with fluid user interfaces and centralized client-side React state management.

SKILLS

- **Frontend:** HTML5, CSS3, JavaScript (ES6+), React, Tailwind CSS, Bootstrap
- **Database:** MongoDB, MySQL
- **Backend:** Node.js, Express.js
- **Version Control:** Git, GitHub
